

	Silesian University of Technology Faculty of Automatic Control, Electronics and Computer Science Department of Graphics, Computer Vision and Digital Systems		 UCZELNIA BADAWCZA INICJATYWA DOSKONAŁOŚCI Współpraca z Najwyższą Szkołą Wyższą  Politechnika Śląska
Rok akademicki	Rodzaj studiów*	Przedmiot:	Sekcja
2024/2025	SSI	BIAI proj.	8
Termin: (dzień, godzina)	Wtorek 15:00-16:30	Prowadzący:	GB
Skład sekcji:	Oskar Chłopaś oc305906@student.polsl.pl Piotr Nowak pn306665@student.polsl.pl		
Karta projektu			
Temat projektu:			
F1 Team Recognition from Car Images			
Główne założenia projektu:			
Overview The goal of this project is to develop a system that can recognize from which Formula 1 team a car belongs to, based on an image of the car. This task is inspired by the human visual system. The model will classify the team based on key visual patterns such as color, shape and livery design. Method of implementation To perform an image recognition we will use Convolutional Neural Network (CNN). This architecture is biologically inspired by the way humans and animals process visual input. Data will be collected from the Kaggle repository which contains images of cars from certain teams. Each image will be labeled accordingly. The model will be trained on these images. Accuracy and confidence scores will be evaluated on a test set. A simple interface will show an input image, the predicted team, and the model's confidence score.
